

Catania

2 to 4 players, Ages 8+

The game takes place in the 8th century, in the year of the founding of Catânia. Each player is a Citizen of Magna Graecia tasked with founding villages and managing the territory's resources. But not everything goes as planned - the Sicilians will try to sabotage Magna Graecia's orders! In the end, the player with the most abundant resources in their villages wins.

Setup

Remove 2 hexagons of each resource, and place the desert in the center of the board - place the Sicels (Robbers) on this hexagon. Arrange the territory hexagons randomly, ensuring at least 2 adjacent to the desert hexagon. With 2 players, remove 2 hexagons from the map. With 3 players, remove 1 hexagon randomly, noting that the desert is not removed in any configuration. Each player collects pieces of their chosen color - 1 city, which will serve as the marker for resource collection order and 3 villages. Place the resource cards in stacks, separated by type. Arrange the numbered discs in a tower, placing the lowest value at the bottom and the highest on top. The first player draws discs from the tower until each resource card stack has a number.

Example of Board Setup with Some of the Components of Catan

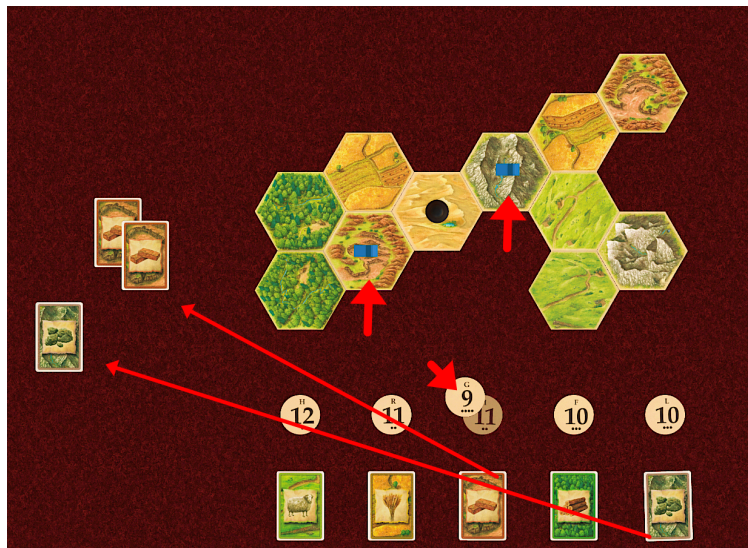

How to Play

The game is played in turns, and in each turn, the player can:

- (A) Order the collection of resources from a given territory by placing their order token on the chosen free territory. Players cannot place their resource collection order token in the location of the Sicélians or in territories occupied by other players.
- (B) Found a village - they must have at least 2 types of cards to found a village.

(A) Ordering Resource Collection

The player can place their resource collection order token on any free hexagon of the map. With this action, they can choose to either collect only 1 card or take 2 cards and, consequently, place the top disc of the numerical tower on top of the current value of the resource.

If a player orders resource collection, they may choose to take 1 stone card, keeping the stone value the same, and take 2 clay cards, reducing the clay value to 9.

Settle a Village

In addition to collecting resources, the player can settle a village on their turn. To do this, they must have 2 or more types of materials in their hand. Founding the village involves playing cards on the table and placing a village token on top of the resource cards representing the majority. If the player has more than one majority resource, they can choose which resource to keep. The remaining cards are discarded. For each type of discarded card, the player takes the numerical disc from the top of the corresponding resource pile and returns it to the disc tower. If the disc being returned to the tower is smaller than the disc on top of the tower, the player must reorder the discs, maintaining the logic that the lowest-value disc remains at the bottom of the tower.

The blue player decides to settle a village and uses 3 clay, 2 stone, and 2 grain cards, keeping the majority of clay for the village. The discarded cards cause a change in resource values. The player returns the numerical disc from the resource pile to the tower. If there is only one disc left in the pile, this action has no effect. The village is represented by the village token placed on the clay cards, which remain face-up until the end of the game.

Sicels

Whenever a red-numbered disc is placed on a resource pile, the Sicels move to an adjacent position on the map at the distance of 1 tile. The landing hexagon cannot be occupied by players, but SICels can occupy an hexagon currently occupied by a player.

End of the Game

Once a player has founded their third village, the other players take their final turn. At the end, the cards each player collected throughout the game are multiplied by the numerical disc value on top of the card piles. The player with the most points wins.

Componentes

QT	Designação
10 (2 of each resource)	Territory Hexagons: cereais, vinho, peixe, pedras calacárias, azeite
1	Vulão Etna Hexagon
8 (2 of each color)	Order Resource Collection token (City)
12 (3 of each color)	Village Token
1	Sicles (Thieves)
95 (19 of each resource)	Resources Cards
18	Numerical discs 12,11,11,10,10,9,8,8,7,6,6,5,4,4,3,2,2,1
